

SELF-CLING VINYL APPLICATION

1. **CLEAN:**

Spray the window you're applying the decal to with soapy water OR window cleaning solution. Clean the window and remove any traces of dirt.

2. **PREPARE:**

Once the window is clean and dry.

Spray the window **again** with water and leave the window wet, ready for decal application.

3. **PEEL:**

Carefully peel off the backing paper from the decal.

4. **APPLY:**

Place your decal on the window and use thick or rigid card to **GENTLY** squeegee all the water out from between the sticker and window.

5. **FINISH:**

Ensure all excess water is squeezed out and wiped away - it will take approx 1-2 hours for the sticker to become fully dry and set for display.
