

Window Vinyl Application

Step 1: Clean the area thoroughly – we recommend using rubbing alcohol. Measure and place the sticker in the desired location. Put a piece of masking tape on the sticker to hold it in place.

Step 2 : Lift the sticker up and peel the white paper backing off the sticker. Be careful not to pull the masking tape off.

Step 3: Slowly lower the sticker and rub it in place with a credit card or similar item.

Step 4: Wait a few minutes then slowly peel the clear cover off at an angle. Be very careful not to pull the sticker off the surface. If the sticker pulls away from the surface repeat step 3.
