

# VINYL STICKER APPLICATION

## 1. CLEAN:

Clean the surface you're applying the decal to, make sure you remove any traces of dirt.

## 2. PREPARE:

If you're applying to a window, spray the window with water before applying the stickers.

If you're applying to a hard surface, simply make sure the surface is clean and dry.

## 3. PEEL:

Carefully peel off the stickers from the backing paper

## 4. APPLY:

If you are applying the stickers to a window, carefully place the stickers on the slightly wet window and use thick / rigid card to **GENTLY** squeegee all the water out.

If you're applying to a hard surface, simply position the sticker and apply light pressure

## 5. FINISH:

Ensure all excess water is squeezed out and wiped away - it will take approx 1-2 hours for the sticker to become fully dry and set for display.
